

Proof

Considered as a **trial design**, similar but different from issued stamp, such as blurred printing, smaller "1943", "Postage" (almost missing) and "size of Rizal monument". Confirmed only in 17C denomination and most of them were with hand drawn blue green ink lines but **an example without the pen marking exists**.

The only known proof without pen marking

Proof, UR Corner Block of 4

Ex Garret, p334

The existence of the proof was known at that time and some of them were consumed as the philatelic use. This is an example of a philatelic use on the FDC of First Anniversary of the Independence stamps.

Errors

Error: Missing vertical perforation

Error: Offset on back of 17C imperforate stamp

Error: 17C imperforate right margin
