

1879

25-MILESIMAS DE PESO

A new 25-milesimas de peso stamp, issued in green, arrived in the Philippines in 1879. Despite this being the commonly used single weight domestic postal rate, only a handful of genuine used examples of this stamp are known to exist. It is highly probable that this issue arrived shortly before September and was subsequently used by the Postal Authorities as one of the two stamps issued for the Universal Postal Union issues in September 1879, hence they were only available for a limited period prior to being surcharged.
