

1879

100-MILESIMAS DE PESO

A new 100-milesimas de peso stamp, issued in carmine, arrived in the Philippines in 1879. Despite being the single weight overseas postal rate to countries other than Spain, only a handful of genuine used examples of this stamp are known. It is highly probable that this issue arrived shortly before September and was subsequently used by the Postal Authorities as one of the two stamps ultimately issued for the Universal Postal Union issues in September 1879, hence they were only available for a limited period prior to being surcharged.
