

APRIL 19, 1880

10-CENTIMOS DE PESO GREEN

POSTALLY USED

(Comex 2021 Certificate)

Very few genuine Postally Used stamps are known

TAMPERED STAMPS

1888 Issue

It is most likely the 10-c Green stamp was not officially released for postal usage and was held in the Post Office until they were ultimately surcharged in magenta to 2-4/8c in 1888. Very few genuine used examples of the un-surcharged 10c green issue are recorded. Most 'used' examples seen to date are tampered stamps wherein the magenta surcharge applied in 1888 has been carefully bleached out, sometimes causing alteration in the green colour. Some examples show tiny remnants of the surcharge remaining visible under magnification.
