Mil. Sta. Vigan  
16 February 1900  
1 May 1900  
26 May 1900

Vigan used military markings for an extended period, recorded from 16 January 1900 to 3 August 1901, but examples are elusive and often not well struck. Even allowing for deterioration of the rubber due to the tropical climate, the evidence is that at least three devices of differing size were used.
