

# Higher weight airmail via Singapore Eight-times rate to Netherlands

The rate is slightly different to the rates table.  
It is possible that the postal clerks incorrectly calculated the component for foreign letter postage.

Manila 1 April 1939, to Amsterdam

### Rate

2P 72c, registered letter weighing up to 40 grams, and over 35 grams.

Airmail postage = 2P 40c = eight x 30c.

Foreign Letter Postage = 12c. I think it should have been 18c, being 12c for first 20g, and 6c for next 20g.

Registration = 20c.
