

B. Odd OB Overprint Combinations

Scott# 241
Double OB Overprint

Scott# 241a with an Extra "O"

Note: On both 2-centavo Rizal stamps, the letters appear ragged or poorly printed and at a slight angle. In contrast with the usual machine press operation, the overprinting in this case was done with a single metal die and each stamp was manually overprinted. This is similar to what was done with some of the Special Delivery issues with black Bandholtz OB overprint.

Scott# 242
Double OB Overprint with One OB Split

Scott# 242
Left and Middle Stamps: Double OB Overprint with One OB Inverted;
Right Stamp: One Vertical OB Reading Down and Other OB Inverted

Scott#
